

Key Learning Points

Basic Programming:

- ◆ Operations
- ◆ Variables
- ◆ Loops
- ◆ Functions
- ◆ If statements

Syntax of Python:

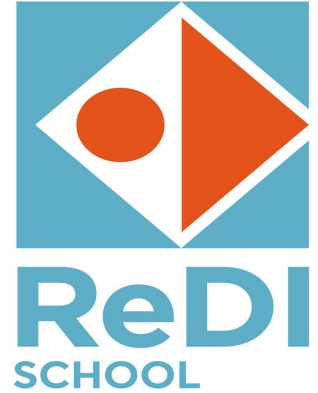

- ◆ `print('ReDI is awesome')`
ReDI is awesome

Versatility of Python

- ◆ Different Libraries

Enhances Critical
Thinking and
Creative Problem
Solving

Career Prospect

- Data analysis and process optimization
- Research purpose

Our final project

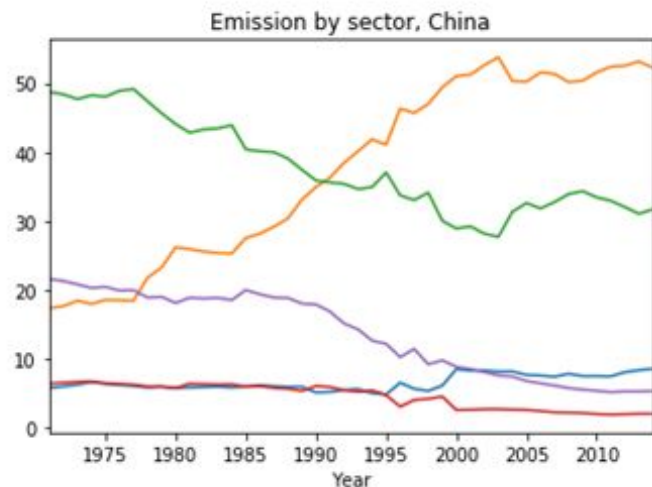

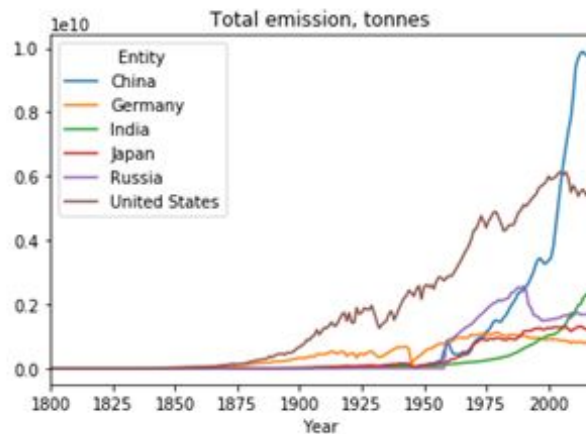

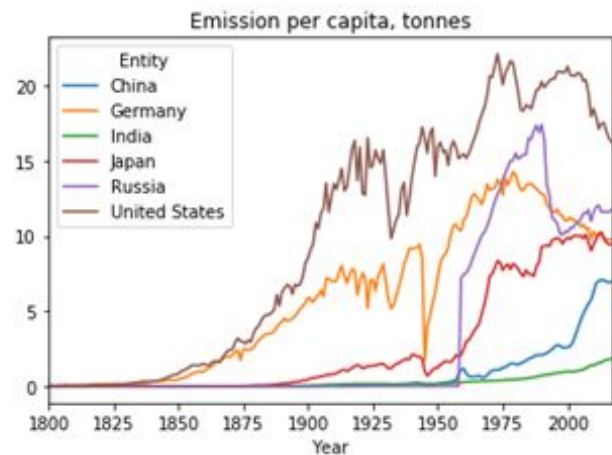

Analyzing CO₂ emission in different sectors

Comparing CO₂ emission with respective year of particular countries

China seems to be very environmentally friendly

... but due to its huge population, it is actually not true :)

Emission per sector in China, the worlds biggest polluter

THANK YOU TO:

Our awesome teachers

ReDI school
